

Project Development Phase Model Performance Test

Date	26 JUNE 2025
Team ID	LTVIP2025TMID31649
Project Name	Lease Management
Maximum Marks	

Model Performance Testing:

Trigger Error:

Validation logic is applied when incorrect or mismatched data is entered during lease record creation (e.g. lease start date after end date).

System throws an error and prevents record creation.

The screenshot displays a web application interface for managing tenants. A modal window titled "New Tenant" is open, showing a form with the following fields:

- Tenant Name:** chinnu
- Email:** chinnu@gmail.com
- Phone:** (empty)
- Status:** Stay
- Property:** Parkside
- Owner:** Sowmya Team

A red error message box is overlaid on the form, stating: "We hit a snag. Review the errors on this page. A tenant can have only one property." The form also includes "Cancel", "Save & New", and "Save" buttons at the bottom.

Validation Check – Dates Different & End Date is Less:

Business rule checks that lease End Date must be after Start Date. If End Date is lesser, system shows validation error and restricts submission.

The screenshot displays the 'Lease Management' interface in the Supriya system. The 'Details' tab is active, showing a lease record for 'supriya' owned by 'Sowmya Team'. The 'start date' is set to 6/20/2025, and the 'End date' is set to 6/19/2025. A red error message 'We hit a snag.' is displayed, stating 'Review the following fields: start_date'. Below the error message, a 'Cancel' button and a 'Save' button are visible. The 'Activity' panel on the right shows 'Upcoming & Overdue' activities, indicating no activities to show.

Validation Rule Check – Dates Same:

A validation rule ensures Start Date and End Date cannot be the same. System flags this as invalid and prompts user to revise inputs.

The screenshot displays the 'Lease Management' interface in the Supriya system. The 'Details' tab is active, showing a lease record for 'supriya' owned by 'Sowmya Team'. The 'start date' is set to 6/20/2025, and the 'End date' is also set to 6/20/2025. A red error message 'We hit a snag.' is displayed, stating 'Review the following fields: start_date'. Below the error message, a 'Cancel' button and a 'Save' button are visible. The 'Activity' panel on the right shows 'Upcoming & Overdue' activities, indicating no activities to show.

Flow Testing – Payment Update:

Flow automation updates Payment Status automatically upon payment log entry.

Test confirms the status updates accurately and triggers notification.
