

Model Performance Test

Date	26 JUNE 2025
Team ID	LTVIP2025TMID31649
Project Name	Lease Management
Maximum Marks	

Model Performance Testing:

Trigger Error:

Validation logic is applied when incorrect or mismatched data is entered during lease record creation (e.g. lease start date after end date).

System throws an error and prevents record creation.

The screenshot shows a web application interface for 'Lease Management'. A 'New Tenant' modal form is open, displaying the following fields: 'Tenant Name' (filled with 'chinnu'), 'Email' (filled with 'chinnu@gmail.com'), 'Phone' (empty), 'status' (set to 'Stay'), and 'property' (set to 'Parkside'). The 'Owner' field shows 'Sowmya Team'. A red error message box is overlaid on the form, stating: 'We hit a snag. Review the errors on this page. • A tenant can have only one property'. The background shows a 'Recently Viewed' list with one item, 'niranjan', and various navigation icons at the top.

Validation Check – Dates Different & End Date is Less:

Business rule checks that lease End Date must be after Start Date. If End Date is lesser, system shows validation error and restricts submission.

The screenshot shows the 'Lease Management' interface in the 'supriya' system. The 'Details' tab is active, displaying a lease form. The 'Lease Name' is 'supriya'. The 'start date' is '6/20/2025' and the 'End date' is '6/19/2025'. A red error message 'We hit a snag.' is displayed, stating 'Review the following fields: start_date'. Below the error message, there are 'Cancel' and 'Save' buttons. The 'Activity' panel on the right shows 'Upcoming & Overdue' activities.

Validation Rule Check – Dates Same:

A validation rule ensures Start Date and End Date cannot be the same. System flags this as invalid and prompts user to revise inputs.

The screenshot shows the 'Lease Management' interface in the 'supriya' system. The 'Details' tab is active, displaying a lease form. The 'Lease Name' is 'supriya'. The 'start date' is '6/20/2025' and the 'End date' is '6/20/2025'. A red error message 'We hit a snag.' is displayed, stating 'Review the following fields: start_date'. Below the error message, there are 'Cancel' and 'Save' buttons. The 'Activity' panel on the right shows 'Upcoming & Overdue' activities.

Flow Testing – Payment Update:

Flow automation updates Payment Status automatically upon payment log entry.

Test confirms the status updates accurately and triggers notification.
